

Kefyalew Abaroro

SUMMARY

Skilled manufacturing and production team member with technical skills and attention to detail. Understands safety and consistently exceeds performance requirements. Dedicated to quality processes and final product results. Hardworking on the floor as experienced in field and ready for challenging assignments. Reliable in completing quality work and exceeding expectations. Reliable technician with skills and attention required to complete safe, accurate work. Dependable in following orders and coordinating with team.

Manufacturing Technician with 6 plus years background in preventive maintenance, equipment repair and operational troubleshooting. Committed to consistently meeting quality expectations and contributing to overall achievement of team output goals. Offers outstanding technical problem-solving talents. Process-oriented tech, skilled in tackling real-world problems with data-driven and dedicated approach. Reads and interprets technical documentation, maintains equipment and adjusts processes to meet dynamic demands. Over 6 years of related experience in industrial environments.

EXPERIENCE

Wolfspeed - Manufacturing Technician

RALEIGH, North Carolina • 03/2016 - Current

- Performed preventative maintenance on manufacturing equipment and machinery
- Developed new processes for improved efficiency in production. For instance, i completed project to establish correlation between UMS impurity check and TQNT production, in which i succeeded to skip running calibration(3.5 hours) worth of time per star cycle.
- Wrote FMEA controlled document for D-system with my Supervisor.
- Wrote D-System Gen-5 tool operating Procedure.
- Wrote AD Epi Tool and AD Ops tool procedure.
- Conduct a project to address background impurity presence on D4 and saved a 2 hour worth of production time between each run.
- Troubleshoot and address issues on multiple tools and developed multi tasking system on the floor.
- Followed detailed instructions from engineering personnel during production runs.
- Maintained a clean work area by disposing of waste materials properly.
- Adjusted, maintained, and repaired various types of manufacturing equipment.
- Identified problems within the assembly line and implemented solutions accordingly.

SKILLS

- Tool Efficiency Development
- Production Log Maintenance
- Final Product Testing
- Materials Knowledge
- Production Methods
- Project Management
- Safety Protocols
- Staff Training
- Troubleshooting and Diagnosis
- Equipment Troubleshooting
- Good Manufacturing Practices
- Process Improvement
- Workflow Coordination
- Materials Loading

EDUCATION AND TRAINING

Bachelor of Arts: History And Heritage Management
Addis Ababa University
Addis Ababa, Ethiopia • 08/2008

CERTIFICATIONS

- Analyzed data from production logs in order to identify areas needing improvement.
- Provided input into process improvements that increased productivity or reduced costs.
- Implemented programs to address production, materials or safety problems.
- Assisted engineers in developing, building or testing prototypes or new products.
- Worked from layout and work order, created programs and set up machines to produce required products.
- Trained new employees on company and safety standards, providing assistance and remediation with issues.
- Performed production adjustments for quality and productivity.
- Adhered to regulations and procedures for health, safety and environmental compliance.
- Read worker logs, product processing sheets or specification sheets to verify adherence to specifications.
- Evaluated existing processes and procedures for opportunities for cost savings or efficiency gains.
- Assisted with troubleshooting issues related to the manufacture of products.
- Operated automated systems to produce product according to customer specifications.
- Monitored inventory levels and ordered parts as needed to keep machines running efficiently.
- Developed new processes for improved efficiency in production.
- Basic Microsoft course diploma
- Time management certificate.

ACTIVITIES AND HONORS

- when it comes to social interaction i am a perfect team player and my work ethics is way and beyond expectation.

ACCOMPLISHMENTS

- Graduated with distinction
